Copy 1

19 November 1959

MEMORANDUM FOR: Chief, DPD-DD/P

SUBJECT: Reduction of Workload in Preparation of  
Mosaics of Future Typhoon Photography

1. As you are well aware, Ops has laid upon PIC a substantial requirement for preparing mosaics of past typhoon photography. This involves an expenditure of several hundred man hours at a time when we are already overloaded in the Technical Intelligence Services Division. However, this requirement will be met as rapidly as we can.

2. To ease this type of workload in future requirements, I have asked TISD to give me some recommendations regarding Equipment and Specifications for Typhoon Photography. These recommendations have been prepared and are forwarded herewith.

3. I would encourage your consideration of these recommendations and adoption where possible. I can assure you that delivery of the kinds of photography specified would greatly expedite and improve the exploitation and mosaicing services desired by Ops.

  
ARTHUR C. LUNDAHL

Director,  
Photographic Intelligence Center
